Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments, see pg. 2-5, filed 02/09/2009, with respect to the Bjermer et al. and Malmstrom et al. references do not inherently teach the claimed invention have been fully considered and are persuasive. The rejections of 10/16/2008 have been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 16, 17 and 19-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhao et al. (Biopharmaceutics & Drug Disposition (1997); (18)9:769-777).

The reference discloses the administration of 10 mg/day of montelukast to elderly patients (abstract; pg. 770). Twelve healthy young adults (panel A, four males and eight females) and twelve healthy elderly volunteers (panel B, eight males and four females) participated in this two-panel study. Mean age and body weight were 31.4 years (20 ± 4.8 years) and 66.6 kg (53.9 ± 8.7 kg), respectively, for young adults, and 69.4 years (65 ± 7.3 years) and 72.0 kg (57.1 ± 8.6 kg), respectively, for elderly subjects. Accordingly, the latter comprise a discrete and separately identified patient population,

and since in the prior art the same drug is administered in substantially the same amounts as the administration claimed instantly, and is specifically targeted to patients who will inevitably have some gray hair (the elderly), one would reasonably expect the prior art methods to inherently reduce graying in that patient population, whether explicitly recognized by the prior art or not.

Conclusion

No claims are allowed.
